01 Discovering Your Niche

What do you want to be known for?

Type in the fields, then save a copy to keep your answers.

Name / brand

Jason Sekany / TPC Baseball & Softball

Date

November 6, 2026

Write down your 7 core pillars.

Pillar 1

Tap In culture: Attitude, Effort, Approach.

Pillar 2

Individual development with a clear plan and progression.

Pillar 3

Guided discovery: help athletes feel, understand, and own movement.

Pillar 4

Integrated skill, strength, mental preparation and training, arm care, recovery, and physical therapy.

Pillar 5

Technology that informs coaching and measures meaningful progress.

Pillar 6

Engaged, educated coaches held to consistent standards.

Pillar 7

A professional facility and a trusted baseball/softball community.

Draft based on prior discussions. Suggested choices are identified in the answers.

02 Building Your Brand Compass

Define your core values and vision.

My non-negotiable values

ATTITUDE - Bring respect, readiness, and a willingness to learn.
EFFORT - Be present and purposeful through the entire session.
APPROACH - Train with intent, understand the purpose, and own the process.

Match training to age, readiness, goals, and program phase. Seek honest athlete feedback through neutral questions before giving an interpretation.

Skill, strength, mental preparation and training, arm care, recovery, and physical therapy must work together. Coordinate the plan and use feedback across modalities to guide progression, with clinical care led by qualified providers.

"A seated trainer is a disengaged trainer." Use the full 50-55 minute class. Prepare, observe, adapt, and give every athlete attention. Hold staff accountable for education, communication, equipment care, and the TPC Standard.

The impact I want to make

Build athletes who understand how to improve and take responsibility for their preparation, performance, and conduct.

Create a connected pathway from youth baseball and softball through college and professional training. Skill development, strength, mental preparation and training, arm care, recovery, and physical therapy are integrated, synergistic modalities. Each supports and informs the others within one athlete-centered plan.

Coordinate coaches, performance staff, and qualified physical therapists around readiness, program phase, goals, and progress. Physical therapy guides rehabilitation and return-to-training decisions when needed; mental training builds focus, confidence, routines, and resilience.

Help families understand the plan and progress. For pitchers, emphasize operating velocity, efficiency, workload capacity, command, execution, and recovery. Build a repeatable standard of coaching and service that supports responsible growth.

03 Your Audience

Understand who you are talking to.

What problems does my audience face?

Athletes face conflicting advice, disconnected lessons and strength plans, unclear priorities, and pressure for quick results. Athletes may chase peak velocity or other isolated numbers without understanding workload, efficiency, execution, and recovery.

Parents need a development plan they can understand. Athletes need coaching that fits their stage, consistent feedback, and a way to recognize progress beyond one day's result.

Where do they spend their time online?

Working assumption to validate with our families:

Instagram for training clips, athlete stories, and program discovery; YouTube for deeper instruction; email and the TPC website for program details and registration. Team and parent group chats likely influence referrals.

Ask members how they found us and which channels they actually use before allocating more marketing time.

What would make their life easier?

A clear assessment, recommended pathway, simple scheduling, and regular progress updates. One connected plan integrates skill, strength, mental preparation and training, arm care, recovery, and physical therapy when appropriate.

Coaches and qualified providers communicate so training, recovery, and rehabilitation reinforce one another. Families understand the priorities, readiness considerations, and next steps instead of coordinating disconnected services themselves.

Draft based on prior discussions. Suggested choices are identified in the answers.

04 Your Brand Identity Map

Define your unique voice and style.

My brand voice (playful, serious, bold?)

Direct, knowledgeable, practical, and demanding with a purpose. Explain the "why" in plain language. Encourage athletes while holding them accountable. Show real coaching and honest progress. Speak to both baseball and softball families. Avoid hype, promises of guaranteed results, and making every story about a number.

My core colors

Gray - lettering/ring/stitching

#8B8E95

Blue - upper chevron

#0191D4

Bright blue - lower chevron

#01BDF9

Dark green - upper chevron

#90A81E

Lime green - lower chevron

#BAD629

White - background/lettering

#FFFFFF

My font style

Suggested: bold, clean sans-serif headings; simple, readable body text.

My 3 brand commandments

1.

Tap In: bring Attitude, Effort, and Approach to every session.

2.

Coach the athlete: listen, meet each athlete where they are at, teach.

3.

Earn trust: show real progress and deliver the TPC Standard daily.

Draft based on prior discussions. Suggested choices are identified in the answers.

05 Positioning Your Brand Story

Write your Founder Note.

Why do I do what I do?

I want athletes to leave TPC more capable, more confident, and better equipped to take ownership of their development. Baseball and softball give us a daily opportunity to teach preparation, accountability, resilience, and intent.

My job is to create the environment, coaching standards, and development pathway that make those lessons real. Attitude, Effort, and Approach should be visible in how we train and how we operate.

What problem am I solving?

I am solving the lack of connection and consistency in player development. Lessons, strength work, mental training, arm care, recovery, and physical therapy lose value when they operate in isolation.

TPC's model brings them into one coordinated, synergistic development process. Coaches and qualified providers use shared priorities and feedback to align training with the athlete's needs, readiness, and goals. Families should understand how each modality supports the whole plan.

What is the transformation I offer?

From isolated training to a purposeful, integrated development process.

Athletes build movement skill, physical capacity, focus, confidence, and resilience. They learn preparation routines and recovery habits, with physical therapy integrated when rehabilitation or clinical guidance is needed.

Skill coaching, strength, mental preparation and training, arm care, recovery, and physical therapy reinforce each other. The aim is a more capable, adaptable, accountable player who can apply progress in competition.

Draft based on prior discussions. Suggested choices are identified in the answers.

06 Your Content GPS

Lay out your content pathways.

My 3 content pillars

Pillar 1

HOW DEVELOPMENT WORKS
Show how skill, strength, mental preparation and training, arm care, recovery, and physical therapy work synergistically within one plan. Teach program phases and guided discovery.

Pillar 2

PROGRESS WITH CONTEXT
Show progress in movement, execution, operating velocity, training capacity, mental routines, and readiness. Explain how coaching, recovery, and physical therapy feedback inform the next step.

Pillar 3

THE TAP IN STANDARD
Show active coaching, athlete effort, staff education, facility care, and the community. Make our standards visible in everyday behavior.

My main platforms

Suggested priority: Instagram for discovery and short teaching clips; email plus the TPC website for clear program information and registration; YouTube for deeper explanations as production capacity allows.

Use the Trainer Hub and Central Hub for internal education and consistent delivery. Capture content during planned sessions with
appropriate permission. Favor useful, repeatable content over posting volume.

Draft based on prior discussions. Suggested choices are identified in the answers.

07 Tools, Allies, and Support

Assemble your team.

Who I need on my team

- [x] Social Manager
- [x] Video Editor
- [x] Designer
- [x] Tech Lead
- [x] Other

Other team role / details

Program directors/Masters; member service; strength/recovery leads; mental performance support; qualified physical therapists. Coordinate responsibilities and provider relationships within one athlete-centered plan. Staffing model to confirm.

Tools I will use

COACHING: TrackMan, HitTrax, Uplift Labs, OnForm, ArmCare, BridgeAthletic, OVR, and PitchTrak - each tied to a specific coaching question.

OPERATIONS: Upper Hand, TPC-admin, and Trainer Hub for scheduling, service, standards, and education.

CONTENT (suggested): a shared content calendar, simple editing/design tools, and basic tracking of inquiries, registrations, and member retention.

Draft based on prior discussions. Suggested choices are identified in the answers.
